Fluoride in the Tap Water

http://www.douglasreport.com/reports/fluoride.html?gclid=CO_r88LLngJwCFQNbXwodYWbpTg

For years fluoride was classified as a toxic waste in this country? In fact, not too long ago its only approved uses were as an insecticide and a RAT POISON!

Fluoridation has been linked to immune system alteration, musculoskeletal harm, genetic damage, thyroid dysfunction, and even cancer. More and more studies are showing that ingesting fluoride has absolutely no bearing on preventing tooth decay. <http://www.naturalnews.com/024855.html> And now the American Dental Association is advising that parents NOT give fluoridated water to babies - BECAUSE IT CAN CAUSE BRAIN DAMAGE! In particular, it can influence thyroid levels, and that can have an impact on the IQ in children who are in the development phase.

Pharmaceuticals in the Tap Water

<http://www.ewg.org/node/26128>

WASHINGTON - A wide range of pharmaceuticals that include antibiotics, sex hormones, and drugs used to treat epilepsy

and depression, contaminate drinking water supplies. Serious side effects at levels less than 100 parts-per-billion, with some causing potential health risks in the parts-per-trillion range.

http://www.prisonplanet.com/articles/march2008/031108_nationwide_alarm.htm

Pharmaceuticals in the water are being blamed for severe reproductive problems in many types of fish. There are problems with other wildlife as well: kidney failure in vultures, impaired reproduction in mussels.

Over 260 contaminants have been detected in tap water.

GENETICALLY MODIFIED ORGANISMS (GMO)

<http://www.seedsofdeception.com/Public/AboutGeneticallyModifiedFoods/index.cfm>

You may have heard the FDA and food industry claims that genetically modified (GM) foods are safe, properly tested, and necessary to feed a hungry world. UNTRUE! Genetically modified organisms (GMOs) are one of the most dangerous and radical changes to our food supply. These largely unregulated ingredients found in 60-70% of the foods in the US, are well worth the effort to avoid them.

'Commercial beehives pollinate over a third of [North} America's crops, 90 percent of which are helped along by the honeybees. Without this pollination, you could kiss those crops goodbye, The genetic modification of the plant leads to the concurrent genetic modification of the flower pollen, which is killing our bee population. Genetically modified seeds are

produced and distributed by powerful biotech conglomerates. The latter manipulate government agricultural policy with a view to supporting their agenda of dominance in the agricultural industry. American conglomerates such as Monsanto, Pioneer HiBred and others, have created seeds that reproduce only under certain conditions, often linked to the use of their own brands of fertilizer and/or insecticide.

According to the London based Independent which broke the story, "...secret research carried out by Monsanto shows that rats fed the modified corn had smaller kidneys and variations in the composition of their blood."

<http://www.organicconsumers.org/ge/corn-study.cfm>

Greenpeace said a study it had commissioned that was published in the journal Archives of Environmental Contamination and Technology showed rats fed for 90 days on Monsanto's MON863 maize showed "signs of toxicity" in the liver and kidneys.

Vaccine and Flu shots

<http://www.whale.to/vaccine/swine.html>

The Great Swine Flu Massacre: In 1976, a small group of soldiers at Fort Dix were infected with a swine flu virus. That would be because the soldiers were heavily vaccinated. 500-600 cases of Guillain-Barre syndrome with 25 deaths (4,000 claimants), while they claim one death from swine flu. A true glimpse into the real nature of the vaccine peddlers.

<http://www.whale.to/vaccines/swine.html>

Well 46 million of us obediently took the shot, and now 4,000 Americans are claiming

damages from Uncle Sam amounting to three and a half billion dollars because of what happened when they took that shot. By far the greatest number of the claims - two thirds of them are for neurological damage, or even death, allegedly triggered by the flu shot. Judy Roberts and some 4,000 others like her are still waiting for their day in court.

Baxter admits contaminated seasonal flu product contained live bird flu virus

<http://waronyou.com/forums/index.php?topic=7093.0>

Baxter confirmed Friday that the experimental product contained live H5N1 avian flu viruses. The contaminated product, a mix of H3N2 seasonal flu viruses and unlabelled H5N1 viruses, was supplied to an Austrian research company.

The contamination incident, which is being investigated by the four European countries, came to light when the subcontractor in the Czech Republic inoculated ferrets with the product and they died. Ferrets shouldn't die from exposure to human H3N2 flu viruses

Baxter To Develop Swine Flu Vaccine Despite Bird Flu Scandal. A U.S. based pharmaceutical company that just weeks ago was involved in a scandal involving vaccines tainted with deadly avian flu virus has been chosen to head up efforts to produce a vaccine for the Mexican swine flu that has seemingly migrated into the U.S. and Europe.

28 Women Miscarry After Receiving HPV Vaccine Gardasil; FDA Says No Reason to Re-Examine Approval

<HTTP://WWW.FOXNEWS.COM/STORY/0,2933,315466,00.HTML>

As of August 2007, a review of the National Vaccine Information Center revealed the following, quite alarming, statistic about this unnecessary vaccine: **2,207 adverse reactions to Gardasil** have been reported. Among them: 5 girls died

31 were considered life-threatening
1,385 required a visit to the emergency room
451 of the girls have not recovered as of July 2007

51 of the girls were disabled.

When comparing 17,000 boys and girls in California and Oregon, the vaccinated children were 120 percent more likely to have asthma. In the group of 9,000 boys, those who were vaccinated were 224 percent more likely to have ADHD, 155 percent more likely to have a neurological disorder, and 61 percent more likely to have autism compared to unvaccinated boys.

Some vaccines, such as vaccines for hepatitis B, contained as much as 12.5 micrograms of mercury per dose. That's more than 100 times the EPA's upper limit standard when administered to infants. Hepatitis B vaccines aren't the only immunizations under suspicion. According to Burton Goldberg in Alternative Medicine, scientists are finding stronger and stronger links between thimerosal and neurological damage.

OBAMA'S FOUR STEP PLAN

1. Drink the water.
2. Eat the food.
3. Take the Shots.
4. Lay down and DIE.

We can't drink the water because the water has been poisoned. We can't eat the food because the food has been poisoned. We can't trust our doctors because their protocols are written by Big Pharma and eugenicists.

If it wasn't for the following evidence I would attribute this three pronged attack to corporate greed and corruption. John Holdren, Obama's Science Czar, says: Forced abortions and mass sterilization needed to save the planet

<http://forum.prisonplanet.com/index.php?topic=118292.0>

John Holdren, whom Barack Obama has recently appointed Director of the White House Office of Science and Technology Policy, -- informally known as the United States' Science Czar. In a book "Eco Science" Holdren co-authored in 1977, the man now firmly in control of science policy in this country wrote that:

• Women could be forced to abort their pregnancies, whether they wanted to or not;

• The population at large could be sterilized by infertility drugs intentionally put into the nation's drinking water or in food;
